

Bristle Rollers

These special rollers are used when conventional finned rollers are not efficient at removing the air in a particular laminate. Bristle rollers work well in knitted or uni-directional fibers when air pockets can form. Bristle rollers are mounted on strong 1/4" QR frames and have a choice of ferrule reinforced wood or plastic handles that accept extensions. Also good in skin coats and mold construction. Note: ES Bristle roller heads are made in USA and have smaller metal strip for longer bristles than inferior imported bristle rollers.

Estos rodillos especialmente son usados cuando los rodillos de aletas no son eficientes para quitar el aire en laminado particular. Los rodillos de acera trabajan bien en telas de fibras unidireccionales o telas de tipo rigido cuando se forman bolsas de aire. Los dos estilos de rodillos de vienen de un marco de 1/4" de acero fuerte y una selección de mango plástico o madera reforzado con un anillo de acero. Para la primera capa y laminación de moldes es o mejor.

Flexible Bristle

Cerda Flexible

- * Flexible stainless core.
Nucleo de acero inoxidable flexible .
- * Excellent bristle roller air relief.
Excelente rodillo de cerda flexible con alivio de aire.
- * Replaceable bristle roller sections.
Respuestos de piezas de rodillos de cerda
- * Great for irregular, concave & convex surfaces. Try in place of "spring" rollers.
Excelente para aplicaciones irregulares , cocavís y convexas.
- * Strong, 1/4" Diameter frames w/ pivoting end caps.
Marcos de un 1/4" de diámetro de acero fuerte con tapas de espiga.
