

MXB075 / MXB200 Drum Mixer/Agitator

MXB075, 3/4" Drum Agitator fits into the 3/4" NPT hole in standard drums. It allows for uniform agitation of low to medium viscosity liquids, suspensions and thixotropic liquids while pumping simultaneously through the 2" opening. MXB-200 screws directly into the 2" NPT drum opening and has a 1.75" blade diameter for increase mixing surface.

1. 3/4 HP American made Gast air motor (MXB075) 1 1/2 hp Gast air motor on MXB200.
2. Unique stainless 3/4" threads for long life. (MXB075 only). One piece anodized aluminum housing on MXB200.
3. Corrosion free Delrin resin block bushing to keep motor free from contamination.
4. Color coded graduated 3/8" NPT needle valve for constant mixing RPM.
5. Stainless Steel Shaft construction.
6. 32" shaft length standard. Shorter shafts available by custom order.

Maximum air consumption – 25 CFM

Blade diameter is larger than the 3/4" NPT opening so to install rotate the blade into the 3/4" of the drum, and then lock the stainless nipple into the drums threads. .
